

Individual and Medicare Underwriting Delays

February 25, 2008

Regence BlueCross BlueShield of Oregon's Individual Underwriting department is implementing a new underwriting system to improve efficiencies and create more consistency in our underwriting practices. This transition may create some system limitations and a temporary delay in the underwriting of individual and Medicare supplement applications. Please note that the application process will not change during this transition. We appreciate your patience as we work to improve our current underwriting processes.

We value your partnership and are here to support you. If you have any questions please contact your sales representative or call 1-888-888-3689.
